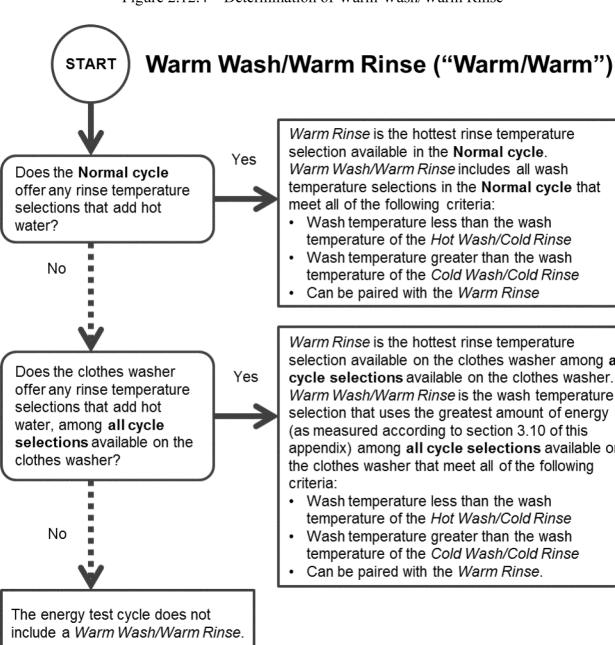

Figure 2.12.4—Determination of Warm Wash/Warm Rinse

criteria:

Warm Rinse is the hottest rinse temperature selection available in the Normal cycle. Warm Wash/Warm Rinse includes all wash temperature selections in the Normal cycle that

Wash temperature less than the wash temperature of the Hot Wash/Cold Rinse

meet all of the following criteria:

Wash temperature greater than the wash temperature of the Cold Wash/Cold Rinse

Warm Rinse is the hottest rinse temperature

Can be paired with the Warm Rinse

selection available on the clothes washer among all cycle selections available on the clothes washer. Warm Wash/Warm Rinse is the wash temperature selection that uses the greatest amount of energy (as measured according to section 3.10 of this appendix) among all cycle selections available on

Wash temperature less than the wash temperature of the Hot Wash/Cold Rinse

the clothes washer that meet all of the following

- Wash temperature greater than the wash temperature of the Cold Wash/Cold Rinse
- Can be paired with the Warm Rinse.
